

Analogue Comparator, Dual, High Speed, 2 Comparators, 4 ns, 2.7V to 12V, MSOP, 10 Pins

Manufacturers	Analog Devices, Inc
Package/Case	MSOP10
Product Type	Comparator ICs
RoHS	Pb-free Halide free
Lifecycle

General Description

The LT1715 is an UltraFast™ dual comparator optimized for low voltage operation. Separate supplies allow independent analog input ranges and output logic levels with no loss of performance. The input voltage range extends from 100mV below VEE to 1.2V below VCC. Internal hysteresis makes the LT1715 easy to use even with slow moving input signals. The rail-to-rail outputs directly interface to TTL and CMOS. The symmetric output drive results in similar rise and fall times that can be harnessed for analog applications or for easy translation to other single supply logic levels.

The LT1715 is available in the 10-pin MSOP package. The pinout of the LT1715 minimizes parasitic effects by placing the most sensitive inputs away from the outputs, shielded by the power rails.

For a dual/quad single supply comparator with similar propagation delay, see the LT1720/LT1721. For a single comparator with similar propagation delay, see the LT1719.

Features

UltraFast: 4ns at 20mV Overdrive

150MHz Toggle Frequency

Separate Input and Output Power Supplies

Low Power: 4.6mA per Comparator at 3V

Pinout Optimized for High Speed Use

Output Optimized for 3V and 5V Supplies

TTL/CMOS Compatible Rail-to-Rail Output

Input Voltage Range Extends 100mV Below Negative Rail

Internal Hysteresis with Specified Limits

Specified for -40°C to 125°C Temperature Range

Available in the 10-pin MSOP Package

Application

High Speed Differential Line Receivers

Level Translators

Window Comparators

Crystal Oscillator Circuits

Threshold Detectors/Discriminators

High Speed Sampling Circuits

Delay Lines
