

TRIAC 600V 8A

Manufacturers	STMicroelectronics, Inc
Package/Case	TO-220
Product Type	Discrete Semiconductors
RoHS	
Lifecycle

General Description

BTA08-600B is a type of thyristor, also known as a TRIAC (triode for alternating current). It is designed to control AC power circuits up to 600V and 8A, making it suitable for use in a variety of electrical applications.

Features

- High current capability
- Low holding current for improved noise immunity
- Voltage ruggedness and reliability
- High surge current capability
- Electrically insulated package for easy mounting

Application

- Motor speed control
- Lighting control
- Heating control
- Power tools
- Home appliances
- Industrial automation equipment
