## General Description

The LTC3639 is a high efficiency step-down DC/DC regulator with internal high side and synchronous power switches that draws only 12 $\mu$ A typical DC supply current while maintaining a regulated output voltage at no load.

The LTC3639 can supply up to 100mA load current and features a programmable peak current limit that provides a simple method for optimizing efficiency and for reducing output ripple and component size. The LTC3639's combination of Burst Mode<sup>®</sup> operation, integrated power switches, low quiescent current, and programmable peak current limit provides high efficiency over a broad range of load currents.

With its wide input range of 4V to 150V and programmable overvoltage lockout, the LTC3639 is a robust regulator suited for regulating from a wide variety of power sources. Additionally, the LTC3639 includes a precise run threshold and soft-start feature to guarantee that the power system start-up is well-controlled in any environment.

The LTC3639 is available in a thermally enhanced high voltage-capable 16-lead MSE package with four missing pins.

## Features

Wide Operating Input Voltage Range: 4V to 150V

Synchronous Operation for Highest Efficiency

Internal High Side and Low Side Power MOSFETs

No Compensation Required

Adjustable 10mA to 100mA Maximum Output Current

Low Dropout Operation: 100% Duty Cycle

Low Quiescent Current: 12 $\mu$ A

Wide Output Range: 0.8V to VIN

0.8V  $\pm$ 1% Feedback Voltage Reference

Precise RUN Pin Threshold

Internal or External Soft-Start

Programmable 1.8V, 3.3V, 5V or Adjustable Output

Few External Components Required

Programmable Input Overvoltage Lockout

Thermally Enhanced High Voltage MSOP Package

## Application

Industrial Control Supplies

Medical Devices

Distributed Power Systems

Portable Instruments

Battery-Operated Devices

Automotive

Avionics
