

Monolithic 16-Bit Serial/Byte DACPORT

Manufacturers	Analog Devices, Inc
Package/Case	SOIC-24
Product Type	Data Conversion ICs
RoHS	
Lifecycle

General Description

AD660BR is a specific model number for an analog multiplier IC (integrated circuit) manufactured by Analog Devices, Inc. The AD660BR is a high-performance four-quadrant analog multiplier that operates on bipolar input signals with a high degree of accuracy and linearity. It is designed to function as a signal processing component in a wide range of applications.

Features

High accuracy and linearity

Four-quadrant multiplication capability

Low input bias current

Wide operating voltage range

Low distortion and noise

Internal temperature compensation
