RFO

General Description

The ISL3245xE are 3.3V to 5V powered, fault protected, extended Common-Mode Range (CMR) differential transceivers for balanced communication. The RS-485 bus pins (driver outputs and receiver inputs) are protected against overvoltages up to ± 60 V, and against ± 15 kV ESD strikes. These transceivers operate in environments with common-mode voltages up to ± 20 V (exceeds the RS-485 requirement), making this RS-485 family one of the most robust on the market.

The transmitters are RS-485 compliant with VCC \geq 4.5V and deliver a 1.1V differential output voltage into the RS-485 specified 54 Ω load even with>

The ISL32457E and ISL32459E include a cable invert function that reverses the polarity of the Rx and Tx bus pins in case the cable is misconnected during installation.

Features

Fault protected RS-485 bus pins: up to $\pm 60V$

Extended common-mode range: ±20V larger than required for RS-485

 $\pm 15 kV$ HBM ESD protection on RS-485 bus pins

Wide supply range: 3V to 5.5V

Cable invert pin (ISL32457E and ISL32459E only) corrects for reversed cable connections while maintaining Rx full fail-safe functionality

1/4 unit load for up to 128 devices on the bus

High transient overvoltage tolerance: ±80V

Full fail-safe (open, short, terminated) RS-485 receivers

Choice of RS-485 data rates: up to 20Mbps

Low quiescent supply current: 2.1mA
