General Description

MC68EC000EI12 is a microprocessor unit (MPU) manufactured by Motorola (now NXP Semiconductors) as part of their MC68000 series of microprocessors. It is a low-cost version of the MC68000 microprocessor and is commonly referred to as the "EC000" or "EC" version.

Features

- It has a 32-bit data bus and a 24-bit address bus.
- It has a clock speed of up to 12 MHz.
- It includes 32-bit internal registers, including an 8-bit data register and a 24-bit address register.
- It has a built-in memory management unit (MMU) to support virtual memory.
- It supports both big and little endian data formats.

Application

- Embedded systems
- Industrial control systems
- Communication systems
- Medical equipment
- Automotive electronics
- Gaming machines
