General Description

The StrongIRFET™ power MOSFET family is optimized for low $R_{DS(on)}$ and high current capability. The devices are ideal for low frequency applications requiring performance and ruggedness. The comprehensive portfolio addresses a broad range of applications including DC motors, **battery management** systems, inverters, and DC-DC converters.

Optimized for broadest availability from distribution partners

Product qualification according to JEDEC standard

Optimized for 10 V gate-drive voltage (called Normal level)

Silicon optimized for applications switching below <100 KHz

Softer body-diode compared to previous silicon generation

Industry standard surface-mount power package

Capable of being wave soldered

Features
