General Description

PC28F128P30B85 is a type of NOR Flash memory manufactured by Intel. Here are its features:

Features

- It has a density of 128 Megabits (16 Megabytes).
- It uses a 1.8V/3V power supply and has a low power consumption.
- It has a fast page access time of 30 nanoseconds.
- It has a sector erase architecture and supports simultaneous erase and program operations.
- It has a high endurance, with a minimum of 100,000 erase/program cycles per sector.

Application

- Embedded systems, such as industrial control systems, automotive systems, and consumer electronics.
- Networking equipment, such as routers, switches, and modems.
- Data storage devices, such as solid-state drives (SSDs) and memory cards.
