

75V Single N-Channel HEXFET Power MOSFET in a D-PAK package

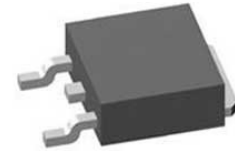

Manufacturers [Infineon Technologies Corporation](#)

Package/Case DPAK

Product Type

RoHS

Lifecycle

[RFQ](#)

General Description

Optimized for broadest availability from distribution partners

Product qualification according to JEDEC standard

Optimized for 10V gate-drive voltage (called Normal level)

Silicon optimized for applications switching below <100KHz

Softer body-diode compared to previous silicon generation

Industry standard surface-mount power package

Capable of being wave soldered

Features

Optimized for broadest availability from distribution partners

Product qualification according to JEDEC standard

Optimized for 10V gate-drive voltage (called Normal level)

Silicon optimized for applications switching below <100KHz
