## General Description

LTC690IS8 is a low power precision oscillator IC manufactured by Linear Technology (now part of Analog Devices).

### Features

- It has a wide frequency range of 10kHz to 10MHz.
- It provides a stable output frequency with a low frequency drift over temperature and supply voltage.
- It has low current consumption, typically 2.2mA at 5V supply voltage.
- It has a small footprint, being housed in an 8-pin SOIC package.

### Application

- Precision timing applications such as clock and frequency generators
- Data communication systems
- Test and measurement equipment
- Audio and video systems
