## General Description

AD1885JSTZ is an audio codec IC (integrated circuit) manufactured by Analog Devices, Inc. It is a 4-channel AC '97 2.3 compatible codec with stereo analog inputs and outputs, and supports sample rates up to 48 kHz.

## Features

- High-performance audio quality with 18-bit resolution
- Support for multiple audio formats, including AC'97 and legacy audio interfaces
- Integrated analog mixer for combining multiple audio sources
- Support for a range of input and output configurations, including line-in, mic-in, and speaker-out
- Low power consumption, making it suitable for use in portable devices
- Flexible power management options

## Application

- Desktop and laptop computers
- Set-top boxes and other multimedia devices
- Gaming consoles
- Portable audio players
- Automotive audio systems
- Telecommunications equipment
