General Description

WJLXT971EA4 is a product of Intel, specifically a 10/100 Ethernet Physical Layer Interface (PHY) transceiver designed for use in networking applications.

Features

Supports 10BASE-T and 100BASE-TX Ethernet protocols

Can operate in half-duplex and full-duplex modes

Includes Auto-MDIX feature, which allows the device to automatically detect and correct for crossed-over cable connections

Includes energy-efficient Ethernet (EEE) feature, which reduces power consumption during low link utilization

Supports various diagnostic and monitoring features, such as loopback tests and LED indicators for link and activity status.

Application

LAN switches and routers

Network interface cards (NICs)

Industrial automation and control systems

IP phones and other communication equipment.
