General Description

IPP60R074C6 is a specific type of power MOSFET, which is a semiconductor device used for switching and amplification of electronic signals in power applications.

Features

It has a maximum voltage rating of 600V.

It can handle a maximum current of 60A.

It has a low on-resistance of 0.074 ohms, which makes it efficient in power applications.

It has a fast switching speed.

Application

Power supplies

Motor control

Solar inverters

Lighting systems

DC-DC converters

Welding equipment

Uninterruptible power supplies (UPS)

High-frequency switching applications
