

Low Voltage Mono/Stereo Power Amplifier/

Manufacturers	NXP Semiconductor
Package/Case	8-SOIC
Product Type	Amplifier ICs
RoHS	
Lifecycle

General Description

The TDA7050T is a specific part number for a mono audio amplifier integrated circuit (IC). It is designed for low power audio applications and is commonly used in portable devices and small audio systems.

Features

- Mono audio amplifier
- Low power consumption
- Wide voltage supply range
- Small package size
- Internal thermal shutdown protection
- Few external components required for operation
- Low distortion and noise

Application

- Portable audio devices (e.g., MP3 players, portable radios)
- Mobile phones
- Small audio systems
- Intercom systems
- Personal computer audio
- Gaming consoles
