

500mA Low-Noise LDO Regulator

Manufacturers	Microchip Technology, Inc
Package/Case	SOIC-8
Product Type	Power Management ICs
RoHS	
Lifecycle

General Description

The MIC5209 is an efficient linear voltage regulator with very low dropout voltage, typically 10mV at light loads and less than 500mV at full load, with better than 1% output voltage accuracy.

Designed especially for hand-held, battery-powered devices, the MIC5209 features low ground current to help prolong battery life. An enable/shutdown pin on SOIC-8 and DDPACK versions can further improve battery life with near-zero shutdown current.

Key features include reversed-battery protection, current limiting, overtemperature shutdown, ultra-low-noise capability (SOIC-8 and DDPACK versions), and availability in thermally efficient packaging. The MIC5209 is available in adjustable or fixed output voltages.

Features

Output voltage range: 1.8V to 15V

Meets Intel® Slot 1 and Slot 2 requirements

Guaranteed 500mA output over the full operating temperature range

Low 500mV maximum dropout voltage at full load

Extremely tight load and line regulation

Thermally efficient surface-mount package

Low temperature coefficient

Current and thermal limiting

Reversed battery protection

No-load stability

1% output accuracy

Ultra-low noise capability in SOIC-8 and DDPAK

Ultra-small 3mm x 3mm DFN package
